REMARKS

The December 14, 2000 Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures states that the nucleotide and/or amino acid sequence disclosure contained in this application clearly fails to comply with the requirements of 37 C.F.R. §1.821 - §1.825 because the computer readable form that has been filed with this application has been found to be damaged and/or unreadable as indicated on the attached CRF Diskette Problem Report. The Notice states that a substitute computer readable form must be submitted as required by 37 C.F.R. §1.825(e).

The Notice states applicant must provide: 1) an initial or substitute computer readable form (CRF) copy of the "Sequence Listing"; and 2) a statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 C.F.R. §1.821(e) or §1.821(f) or §1.821(g) or §1.825(b) or §1.825(d).

In response, applicants without conceding the correctness of the Examiner's position but to expedite prosecution of the subject application enclose a computer diskette containing the sequence listing in computer readable form. Applicants attach hereto, as **Exhibit B** a paper copy of the revised computer readable form of the sequence listing. Applicants attach hereto as **Exhibit C** a Statement in Compliance with 37 C.F.R. §1.821(f) certifying that the computer readable form contains the same information as the paper copy of the sequence listing attached as **Exhibit B**. The sequence listing does not contain any new matter.
